

RISE Research Institute of Sweden

Internship in perception and sustainability research

About the organization ([Website](#))

RISE is Sweden's research institute and innovation partner. Through international collaboration programs with industry, academia and the public sector, RISE ensures the competitiveness of the Swedish business community on an international level and contributes to a sustainable society. RISE is an independent, state-owned research institute.

Your internship leader, Marta Zakrzewska is a researcher at RISE and faculty member at the Swedish Program, with background in sensory perception, neuroscience and social attitudes. At RISE, she is involved in project on a broad range of research topics related to sustainability and perception: sensory evaluation of new materials and products, attitudes towards sustainability initiatives, implementation and evaluation of sustainable initiatives (for example: to food waste studies). During your internship, you'll have the opportunity to contribute to ongoing research projects based on mutual interests and availability.

Learning objectives

You'll gain hands-on experience in designing and conducting sensory perception and/or online studies. This internship offers insights into real-world sustainability challenges and, optionally, training in data analysis using free software tools such as R, JASP, or JAMOVI.

Responsibilities

- Participant recruitment and management
- Collecting data in experimental settings
- Maintaining research confidentiality
- Optional: data analysis and summary

Preferred background or skills

- Major/minor in psychology. Other backgrounds are welcome but require contact with internship leader prior to enrollment.
- Enthusiasm for learning and research
- Good communication and people skills

Location

RISE Research Institutes of Sweden, Drottning Kristinas väg 61, Stockholm

Hours

5-8 hours per week
